

Magnetic Field Indicator D 250 Magnetpulverprüfung

Art.-Nr. 134.003.100

The magnetic field indicator type D 250 is designed in accordance with the following specification methods of non destructive testing :

MIL-STD-271 E, § 4.3.2.5.5, figure 8

NAVSHIPS 250-1500-1, § 12.4.1.5, figure 12 – 17

ASME, section V, Art. 25, SA-275, figure 8

The sample is used for localization of magnetic fields and their directions during performance of magnetic particle testing.

Technical data:

- sample diameter: 27 mm
- sample heigh: 4 mm
- holder length: 100 mm
- weight: 42 g
