Price reduction

Dear customers and dear business partners

After the outbreak of the corona virus (SARS-CoV-2), we unfortunately were forced to raise our prices for remover and developer due to the shortage of ethanol and isopropyl alcohol and related drastical price increases.

However, in the meantime availability and price situation for these raw materials have stabilised, thus we immediately pass on the reduced raw material prices, and reduce the prices for many of our products.

We thank you for your understanding and your loyalty in these difficult times, and we look forward to receiving your orders.

Yours faithfully

Prof. h.c. Dr. h.c. Nathanael Riess
CEO HELLING GmbH
